TABLETOP X-BANNER TEMPLATE

BLEED AREA: To avoid white edges when trimming, extend just the background to the full bleed area.

TRIM AREA: The area we aim to cut at.

SAFE AREA: Keep all important data such as texts and logos inside the safe area. If there is anything outside, it will be at risk of getting cut off.

Have questions? E-mail us at **design@lifeincolors.com** and our designers will be able to help.

IMPORTANT TIPS! PLEASE READ CAREFULLY.

- Images should be embedded. There shouldn't be any links to certain images on your computer. If needed, please send images to us in a zip file.
- Images should be 300 DPI and in CMYK mode, not RGB.
- Flatten all transperencies
- All text should be in outlines.
- Don't forget to send it in PDF with bleed and crop marks.
